

Tricia Hamon, MHA, RHIA, CCS
Manager, Data Analytics
Trinity Health

Tricia has over 19 years' experience in healthcare with inpatient, outpatient, and research billing and coding compliance, as well as data analytics and auditing. Tricia has been employed with Trinity Health for over 13 years. Graduated from The Ohio State University with a Bachelors in Health Information Management and Ohio University with a Master's in Health Care Administration.

As an auditor performed Baseline Inpatient and Outpatient coding, Sepsis, 3-Day Payment Rule, Readmissions, EMTALA, Provider Based Clinic, Proper Patient Placement 2-Midnight Rule (Condition Code 44 and W2), Telehealth, Discharge Disposition Post-Acute Transfer (PACT), and Injection & Infusion reviews. Created analytics for Proper Patient Placement 2-Midnight Rule (Condition Code 44 & W2), Discharge Disposition Post-Acute Transfer Rule (PACT), Sepsis, Readmission, ED E&M data analytics.

Session Title: The PEPPER Report: Measures and Use of the Data “A Dash of PEPPER!”

Brief outline of session:

- Educate audience on the importance of using PEPPER data in assessing & mitigating organizational risk
- Inform audience how to obtain their PEPPER reports
- Demonstrate how to interpret the PEPPER data
- Show how data can be condensed into a dashboard to review data for multiple institutions at-a-glance and assess risk broadly
- Explain and demonstrate other useful ways data can be used to assess organizational risk
